

**Women in Science
Engineering and
Technology**

NWED 2015

**We're on the right track for National
Women in Engineering Day!**

Join us at **Manchester Victoria Station** as we celebrate successful women in engineering.

We will hear inspirational stories, discuss challenges and share personal experiences.

Our networking sessions offers the opportunity to chat to female engineers, scientists and technologists from both industry and academia.

We will learn more about the redevelopment of Victoria Station including the new roof construction, the restoration of the iconic building and also the 'electrifying' side of the railway.

Keynote address:

Professor Danielle George

Professor of Radio Frequency Engineering, School of Electrical and Engineering and Associate Dean for Teaching and Learning

Target audience:

All Students (UG/PG) and Staff from the Faculty of Engineering and Physical Sciences.

**Men are most
welcome to join!**

Tuesday 23 June 2015, 13:00-16:30

Manchester Victoria Station and the National Football Museum
