

# Reach Your Full Potential

## Women in Science Engineering and Technology

### Keynote address:

#### Dr. Danielle George

Reader, School of Electrical and Electronic Engineering, and Associate Dean for Teaching and Learning.

### Target audience:

All Students (UG/PG) and Staff from the Faculty of Engineering and Physical Sciences.

## The Sky's the Limit on National Women in Engineering Day!

Join us at the **Concorde Hangar** as we celebrate successful women in engineering.

We will hear inspirational stories, discuss challenges and share personal experiences.

Our structured networking session offers the opportunity to chat to female engineers, scientists and technologists from both industry and academia.

We will also explore the unique aviation engineering, ground breaking technology and the supersonic science behind the airliner.

Men are also most welcome to join!
