

TechSmith Guides

Installation

TechSmith Relay can be installed on University Managed PC\Laptop and on Personal/unmanaged devices. See full instructions on Knowledge Base

Making the Recording

Prepare your recording area and organise whatever it is you're going to record. It could be a Word document with instructions, webpage, wiki, a sample math problem, PowerPoint slide, etc.

Adding Relay recordings to your Blackboard course

Relay recordings are automatically uploaded to a TechSmith Relay series on the Podcast Video Portal. This series is viewable by all staff and students who login using their University credentials.
